Address by

MR. G. D. NAIDU

TO

Some MEDICAL MEN in Stuttgart (Germany)

on 20th September, 1955.

Dear Doctors and Friends,

I am very happy to be here amidst several of eminent doctors in various capacities. I am sorry I am not able to speak in the German language, though I am able to understand very little.

In my young age, I was doing some agricultural work, but not in a scientific way. Up to now, I was engaged in transport and in some industries. Of course, recently I took interest in teaching especially in automobile and radio. Some of your country students also came to India for training in these courses, and you will be glad to know that one of the students got first prize in the automobile course. He is also sitting here.

In my leisure time, I made some experiments in agriculture by giving

injections of some chemicals to plants. I spent a little time every day for 7 years. Then I got some success. I made such experiments in cotton, maize, cauliflower, banana, red-gram, papaya, orange, etc. Except orange, in all others I was successful in my aim.

Some of these photos are here, with some remarks made by some eminent visitors. I gave the seeds to your government for experiments. Mr. Stoss, the agricultural minister and Mr. Lang, the secretary, took much interest, and they were interested in tests in the Tubingen and Karlasruhe laboratories. Their reports also are here. Some photographs of plants taken in Laboratory and sent by Mr. Lang are here. In these photos, the plant grown by my seed and the other plant brought together are shown. In these, the plant of my seed has grown more than double the height in the same period.

Your governmental laboratory test also shows that the chromosomes in my seeds have increased double by the injections. I gave the injections to these plants

6 years back. Still they give the same quality and yield the same quantity.

When I conducted the vacational courses, I am fortunate to meet one Doctor B. P. B. Naidu who is an extraordinarily able man and an expert in pathology. He had been in England for about 25 years and in India about 25 years in continous service. With his help, I started the Bacteriological Course also. With the experience of this doctor in Indian medicinal herbs and his great desire in studying them and with my little experience in agricultural work, I was induced to do some work and to bring some results in medicine.

You know up to now there is no medicine to give complete cure for Diabetes, Asthma, Cancer, Bloodpressure, Leucorrhoea and some other diseases. I requested this Doctor to help me in this line. Then this Doctor took great interest to make research in diabetes and Leucorrhoea. I helped him in bringing the necessary plants with the particular quality and the required quantity for his researches. And so I have got success in these two medicines. Several

hundreds of women patients were treated in India for Leucorrhoea. All of them were cured. Of course, when there is no other disease in women, the Leucorrhoea can be cured completely in 6 days or at the most in 12 days.

The cost of the Leucorrhoea medicine may be 3 or 4 Marks. This disease is spread all over the world from 40% to 70% according to the nature of the people in different countries.

The medicine for Diabetes was given here to some patients; all of them were cured. To-day, I read in the papers that the medicine made in this country can cure persons having less than 5 year old diabetes, and persons after 45 years of age; that means if below 45 years of age, there is no cure, and if more than 5 years old disease also there is no cure. My medicine has already cured more than 8 years old cases and people aged 35 to 55 years of age. Some of the case reports I have got here for your perusal. Out of these cases, some have been cured within 4 weeks and some cases took 3 months and 4 months, at an average

between 2 and 3 months, all of them were completely cured. I have letters received from your country people, about such cure by this medicine. I have some case records, from Switzerland, England and India.

One of your country men, who is also present here suffered from diabetes for more than 7 years and he is above 45 years of age. He has been cured. The record sheet shows on the **21st of March** the sugar was 3.6 % in the urine and 250.8 in the blood and on the **14th May** 1 % in the urine and 160.0 in the blood. Subsequently, there was no sugar at all. Before he took this medicine, he was taking Insulin injections daily for the last 4 years, he was very strict in diet and he was not able to work continously for more than 2 hours. Now from the above date no injections were given to him. He is taking all kinds of foods. He is not feeling thirst and he does not pass so much urine as before. He gets good sleep and he feels more healthy. Now he can work continously for the whole day. His weight has increased by 7 kgs. In the same way, and with the same result there are other reports.

Dr. Ebert, Dr. Freihofer, Mr. Schmidtmann, Mr. Stoll, Mr. Kummel, Mr. Natter, Mr. Karst and some other friends in Germany have taken much interest in these medicines. Therefore, I like to give these particulars to you before the experienced doctors. Dr. Ebert and Mr. Schmidtmann suggested to open an association here in my name. I do not want to take such responsibility. I agreed to be a member if an association called Naidu Herb Research Association is started, wherein the name of Dr. B. P. B. Naidu may come in some capacity, in order to remember his name, as he was the main cause to bring out this medicine successfully in such a short time.

I gave this medicine for test in some other places too on certain conditions. I said I would make arrangements to supply this medicine from India at cost price. They did not agree. But they wanted me to take some amount in lump sum. I refused because I thought it is not right to earn in this business which is useful for all humanity. But Herr Dr. Ebert and some other friends agreed for this condition.

Therefore I am glad to supply this medicine here so that your country people may get the benefit. Upto now, I visited several places and many, both Ladies and Gentlemen, offered small payments as well as big payments. But 1 did not accept any payment as cost or fees or as presents or gifts in this connection.

Of course, in some places from other friends, I accepted some laboratory equipments such as microscopes, measuring instruments and some laboratory articles. I accepted from some places some watches and clocks also, though they are not laboratory equipments. They are given as gifts to be given as presents to some people who are connected directly or indirectly with my work. I have got already 4 to 5 boxes of presents. I have not accepted gifts from several places because, I fear, I have to incur too much expense towards shipping charges and perhaps heavy Duty too. Some friends from Hamburg, Koln, Berlin, Esslingen, London, Geneva and some other places have sent several articles as gifts or samples to India without even

asking me. I do not know whether those articles will be useful for our country or not. Now I request all of you, my friends, not to send any more. Soonafter, I go to India, I will write if I want any more materials. Then, you can send them according to your wishes which I will accept gladly.

I do not want to take much of your valuable time, but I will be too glad to answer any questions. My thanks to all friends here.

DIABETES MELLITUS Albert Kieser (21-3-55 — 30-7-55) Sugar in urine & blood decreased steadily Put on weight.

21-3-55 Blood sugar 250.8 mg. per 100cc.

Report on my Diabetes case

By Mr. Kummel I learnt that Mr. G. D. Naidu has a medicine against Diabetes. Mr. Naidu was kind enough to put this medicine at my disposal for a cure.

As regards my personality and my diabetes case:

I am 52 years of age and have had sugar in blood and urine since 1952. Early in 1955, the sugar percentage in the urine had risen to 5. My physical state was such that I was practically no longer able to work. My weight had decreased from 160 pounds in 1952 to 118 pounds in March 1955.

On March 21, 1955 I started the cure with the medicine put at my disposal by Mr. Naidu, and I finished it on 30 July 1955. During that time, the sugar percentage in the urine and in the blood decreased steadily. My weight increased by

G.H. / E.T.

15 pounds during that time. My state of health was such, that I could fully fill my position as a foreman in a machine factory. Since the cure was completed, no sugar could be found at repeated thorough medical examinations.

My state of health is excellent. I am greatly obliged to Mr. Naidu for the medicine put at my disposal.

Bericht uber meine Zuckerkrankheit.

Durch Herrn Kummel habe ich erfahren, daB Mister Naldu ein Mittel gegen die Zuckerkrankheit hat. Herr Naidu war so freundlich mir dieses Mittel zu einer Kur zur Verfugung zu stellen.

Zu meiner Person und miener Krankheit.

Ich bin 52 Jahre alt und habe seit 1952 Blut- und Urinzucker gehabt. Anfang des Jahres 1955 ist der Zuckergehalt auf 5% im Urin gestiegen. Meine korperliche Verfassung war so, daB ich praktisch nicht mehr arbeiten konnte. Mein Gewicht nahm vom Jahr 1952 von 160 pfund auf 118 pfund im Marz 1955 ab.

Am 21. Marz 1955 begann ich mit der mir von Mister Naidu zur Verfugung gestellten Medizin die Kur, und beendete diese am 30. Juli 1955. Der Zuckergehalt im Urin und Blut going wahrend dieser Zeit standig zuruck. Mein Gewicht nahm in dieser Zeit um 15 Pfund zu. Mein korperliches Befinden war derart, daB ich meinem Beruf als Werkmeister in einer Maschinenfabrik voll und ganz nachkommen konnte. Trotz wiederholten grund-

lichen Untersuchungen gonnte seit Beendigung der Kur keinerlei Zucker mehr nachgewiesen werden.

Mein korperliches Befinden ist ausgezeichnet. Ich bin Mister Naidu auBerordentlich dankbar fur die mir zur Verfugung gestellte Medizin.

Albert Kieser.

LEUCORRHOEA Account of two cases – from Mr. Schmidtmann, Festo Machinen Fabrik, Esslingen, Stuttgart, Germany. 24—3—1956.

❖ ❖ ❖ ❖

All those people who have been cured and treated by your medicine for diabetic are writing to you directly. Therefore I hope you will have a complete record by now.

On Monday last I did see a doctor to whom I did give some powder of yours to cure leucorrhoea. He treated a very bad case and was taken aback of the healing effect of your powder. His patient is completely cured of this evil sickness. According to your wish he did take no charges from the patient. However he is not allowed to treat this kind of sickness as this is, according to German laws, a case of V. D. However he gave me a book of poetry written by him in order to get contact with you in spiritual way. I am sending this book with the same mail, but I am afraid it will not be of much use for you as it is written in German language. At any rate in case you should come to Germany again it would be a honour and privilege for him to make your acquaintance.

Trusting this letter will reach you in good health, I am,

Yours sincerely,

(Sd.) R. Schmidtmann.

G. D. Naidu, Esq.,
30, West Cromwell Road,
Earls Court,
London, S. W. 5.

Dear Mr. Naidu,

I would like to thank you for the medicine you gave me for Leucorrhoea.

I must mention here that I did not at all know that what I was suffering was a disease hence I did not go to any Doctor – the symptoms of which were pain in the back and constant poor health and tiredness. It was only when I typed your letters to various Doctors in Germany and Switzerland did I come to know that I had the same disease.

I have been suffering from this for the past 10 years and after taking your medicine for only six days I was free from all the symptoms and now enjoy a good appetite and good health, I have also gained six pounds in weight.

G. K.

I am really very grateful to you for having given me this medicine and am quite sure that many more women who take this course will undoubtedly be cured as I have been.

I do not know really how to repay you as you refused to take payment for the treatment. So I trust that this letter expressing my gratitude will compensate for it.

Once again I thank you very much indeed for your kindness and my good wishes go with you in all your endeavours to help mankind.

Yours sincerely,
(Sd.) (Miss) C. M. Middleton.

Translation/Loe

Karl Neumann,
Weinbergstr 14, Born 14th May, '05.
Hofingen near Leonberg.

To
Mr. Naidu, London.

Diabetic since September, 1943. From this time to date I have injected ca. 40 units of Insuline per day. My state of health was usually satisfactory, I was always fit to work, since I strictly kept to the prescribed diet; but I could not exist without the Insuline injections. Before falling sick, I had a 90 kg weight; from then to date I have had about 70 kg.

During the last time before falling sick, I was very nervous, i. e. excited and mentally depressed. At present, I feel no longer that inner unrest, and I believe that by the medicine from Mr. Naidu, I shall recover.

Since 26th September, 1955, I have taken the medicine 3 times a day, i. e., one

teaspoonful each time, before the meals. Since that time, I have always felt well. As for diet, I keep to the prescriptions of Mr. Naidu.

I am under strict control by Dr. Freihofer, Stuttgart, during the treatment.

(Sd.) Karl Neumann,

PRILLY, Switzerland. 6th June, 1956.

Dear Mr. Naidu,

First of all I must thank you most sincerely for your kind letter of the 25th February with which you sent me the form to fill in for my Father-in-law. Due to various impediments I have not been able to reply earlier. But I am sending you herewith the said form duly completed and which I hope will be of help. My Father-in-law would of course be prepared to go to Germany to see the Doctor. He has continued taking different pills and teas but they do not seem to get at the root of the trouble and the sugar percentage is still present. It seems that the best results have been had from the Coppaltra plant of which I gave you the name.

❖ ❖ ❖ ❖

Thanking you once again for you kind attention, my wife daughter and myself send you our very kindest regards.

Yours truly,
(Sd.) E. Volken.

AGENT

Dear Mr. Volken,

I am sorry for the delay in replying your letter dated the 28th January, 56. I received your previous letter also. I am very sorry on account of my absence in the town, I was not able to reply at once.

You asked me about the diabetes medicine and the address of the gentleman who is in Germany and who has got this medicine. I am very sorry to state here that the medicine is not yet sent to Germany, because one of the main herbs for the medicine is to be removed only in the month of May. Hence the medicine is not yet ready while all other ingredients are ready. Only the medicine for Leucorrhoea is always available.

G. N.

When I send the diabetes medicine to Germany, I will also send you the same directly. But when you receive this medicine. you should go to Germany to see the friend to whom I have already given the medicine to know how to use this medicine and other particulars,

I am enclosing herewith a questionnaire in German and English, which please answer in English and in German.

Thanking you,

Yours sincerely,
(Sd.) G. D. Naidu,

Dear Mr. Naidu,

I really do hope that you will not think I am annoying you with this second letter regarding the medicine for the sugar diabetes. I wrote some weeks ago but perhaps my letter did not reach you. Since then my Father-in-law has been having treatment from another doctor but the sugar percentage has increased instead of diminishing and so I beg you to give me once again the name of the doctor in Germany. Although he does not know you he feels that your treatment would do him a great deal of good and has great confidence.

I suppose you have found a lot of work waiting for you since your return after so many months absence abroad. Please do not fail to let us know when we must order the watches from Solvil.

My wife and daughter send you their best regards and we look forward to seeing you again for a cup of coffee.

Yours faithfully,

Dear Mr. Naidu,

We thank you most sincerely for your telegram of New Year's Greetings as well as the Christmas card. It is also with pleasure that we send you our warmest greetings and wishes for a Happy and Prosperous New Year. ... ...

Before closing this letter I must ask you if you can give me the address of the doctor in Germany (Stuttgart?) who has your treatment for Sugar Diabetes as my Father-in-law would like to go there and start the cure. If you can send me any of the medicine I would also be very grateful and naturally would pay for the postage etc. involved.

Will close for to-day and once again we, my wife, Lisette and myself send you our kindest regards and hope to hear from you soon.

Yours truly,
(Sd.) E. Volkan.

Walter Neef

Fellbach/Stuttgart,
17, August 55
Traubenstr. 25

Dear Mr. Naidu,

Mr. Hammer has phoned me today that I shall send you the questionary to your address in London,

I am very much obliged to you that you will help me against the diabetes and give your medicine for which I thank you very much.

Now I will ask you, what the powder costs, that I can save some money for it.

You may excuse that I have written with the machine but I think you will read it better.

In hope, that your wonderful medicine will help me too.

I send you many greetings.

Yours sincerely,
(Sd.) Walter Neef.

Sehr geehrter Herr Prasident!

Leider ist mein Schreiben an Sie bzw. nach Indien vor dem Kongress nicht mehr moglich gewesen und komme ich erst heute, nachdem ich am 27—10—55 erst zuruckgekehrt bin, dazu, es abzusenden.

Ich mochte Ihnen nochmals herzlich danken fur Ihren Besuch und die Bereitwilligkeit, mir Proben Ihres Praparates gegen Diabetis zur Verfugung zu stellen.

G.R./G.

Dem Prasidenten der Intern. Freien Akademie habe ich von Ihrem Besuch erzahlt, der sehr grosses Interesse an Ihrem Praparat hat.

In der Hoffnung, dass es Ihnen gesundheitlich sehr gut gehen moge, erlaube ich mir, Sie zu begrussen.

Ihr sehr ergebener,

Letter from Dr. Otto Freihofer. Some cured with Diabetes powder request for Diabetes & Leucorrhoea Powders.

To
The President
Industrial Labour Welfare Association Ltd.
Gopal Bagh
Coimbatore, India.

Dear Sir,

Mr. Naidu was here. We discussed about the diabetic and other medicines. Some people are already cured here by this medicine. One of my patient is taking this medicine which Mr. Naidu gave me. Even within one week he feels better, sugar also reduced. I would like to try to some

other patients also. When I asked Mr. Naidu for the price, he said he wont accept payment, but he asked me to write to you for two tins of diabetes medicine and also one tin leucorrhea medicine for trial free of cost.

I hope you will send as early as possible.

I am sending this copy to Mr. Naidu.

Very truly yours,
(Sd.) Dr. med. Otto Freihofer

G. D. Naidu, Esq.
c/o Thomas Cook & Son,
Berkeley Road,
London S. W. 1

Dear Mr. Naidu,

Much to my regret you took leave so unexpectedly that I was not able to talk the following over with you:

In Mr, Stoll's firm as well as in a reputed house specialized in natural pharmaceutical medicine, I act as advisor. The last mentioned firm built a new factory in 1953. Right now the owner is in Spain and will return in the beginning of September this year.

This firm is searching for good and approved medicines to cure diabetes, leucorrhoea, rheumatism, sciatica etc.

They are fully trustworthy and would be ready to pay high licence fees, and agree

to keep the secrets. I would firmly recommend business connections as the firm is represented all over Germany and makes a considerable turnover. Therefore I would like to ask you, dear Mr. Naidu, to consider taking up business connections with the afore mentioned firm.

Looking forward to your further good news, I remain,

Yours sincerely,
with best regards
(Sd.) Dr. Eugen Ebert.

30, West Cromwell Road,
Earls Court, S. W. 5

26th Aug., 55

Dr. Eugen Ebert,
Stuttgart-O,

Dear Doctor.

I thank you very much for your letter dated 11th August. I am sorry for the delay in replying.

I shall be only too glad to supply the medicine to cure Diabetes, Leucorrhoea and other diseases. I want this medicine to be distributed more or less at cost price with very little profit so that all people can have the benefit of curing these dreadful diseases. You know when I was there, one friend agreed to this condition for distribution of this medicine to a certain area – of course not in Germany. He has already helped the Association with several equipments and other materials worth about £1000. Of course this is not in connection with the terms of sales of the medicine. He agreed to distribute the medicine with 5% profit for himself. In the aame conditions I am willing to give to your friends also. One difficulty must be mentioned here is that the Diabetes medicine is not available in great quantity.

I have to grow the herbs to get the extract. This will take time, but the other medicines can be supplied in any quantity.

While the Diabetes medicine is a little costlier all the other medicines are very cheap, particularly for leucorrhoea disease for women. The medicine will cost only 2 or 3 marks for complete cure. Though there are some medicines to relieve the troubles of Leucorrhoea no medicine has cured completely. This medicine has already been tested in several hundreds of cases. In the countries of Asia and Europe etc., more than half of the women population is suffering with the disease for intermittent long periods. This medicine will be a boon for the women suffering with this disease.

I am coming to the Hanover Fair on the 11th or so and I shall be in Hanover until the end of the Fair. From there I will come to Stuttgart before the Fair or after the Fair and we shall then discuss everything in person.

With kind regards,

Yours sincerely,
(Sd.) G. D. Naidu.

G. W. / G.

Hoffnung fur Zuckerkranke

Professor Dr. Ferdinand Bertram (Hamburg) hat am Schlubtag der 18. Tagung det deutschen Gesellschaft fur Verdauungs- und Stoffwechselkrankheiten in Bad Homburg die Entdeckung neuartiger Substanzen bekanntgegeben, die bei Verabreichung in Tablettenform den Blutzucker senken und damit vielen Zuckerkranken die Moglichkeit geben, die bisher notwendigen Insulin-Injektioaen ganz order teilweise zu vermeiden. Es handelt sich dabel um die Substanz BZ 55 der Firma C. F. Boehringer in Mannheim. In Diskussionsbeitragen berichteten Professor Stotter (Augsburg) und Dr. Creutzfeldt (Freiburg) uber gleichartige Erfahrungen, die sie mit der Substanz D 860 gemacht haben, die von den Farbwerken Hoechst entwickelt wurde.

Nach eingehenden Untersuchungen, die seit uber einem Jahr in Hamburg und Berlin vorgenommen wurden, wird als erstes Praparat dieses neuen Diabetikermittels in Tebletteniorm die bisherige Substanz BZ 55 unter zwei verschiedenen Bezeichnungen als Nadisan (Boehringer) und Invenol (Farbwerke Hoechst) den Aerzten in einigen Wochen zur Verfugung gestellt werden konnen.

G. W. / G.

Professor Bertram fuhrte in seinem Referat aus, daB die Behandlung von bisher 100 Diabetikern mit BZ 55 bei einem hohen Prozentsatz ohne jegliche Nebenwirkungen eindeutige Stoffwechselbesserungen erbracht habe. Die gunstigsten Resultate wurden bei Zuckerkranken uber 45 Jahre mit kurzer Krankheitsdauer erzielt. Geringe Erfolgsaussichten bestunden bei allen jugendlichen Diabetikern und solchen Zuckerkranken uber 45 Jahre, die bereits langer als funf bis zehn Jahre krank sind. Bertram erkiarte, die bisherigen Erfolge seien so uberzeugend, daB er sich berechtigt glaube, von dem ersten wirklich wirksamen peroralen (durch den Mund einnehmbaren) Antidiabetikum Antidiabetikum sprechen zu konnen. *AP*

Die Gorres-Gesellschaft hat zum AbschluB ihrer General-versammlung in Freiburg ihren vorstand mit geringen Aenderungen fur sechs Jahre wiedergewahit. Prasident der Gesellschaft bleibt der Kolner Professor Peters. Neu in den Beirat wurden unter anderen Professor Max Muller, Freiburg, und Professor Hoffner, Munster, gewahit. Die Zahl der Sektionen wurde auf elf erhoht. (bu)

Werner Riederer Vitale - Milano (Italia) - Galleria Del Corso 1 writes on 9th July, 1955.

Dear Mr. Naidu,

On the occasion of our meeting here I told you I wanted to give something for your Association. Though several other friends offered, you refused anything from me. I understand you have accepted some materials like, Microscope, Microprojector and a car for your work with the Association.

You mentioned that you wanted to send some watches to your people for which you were unable to spare travellers cheques. I shall pay for all the watches you selected in Black Forest and in the Exhibition. Of course they are very good watches even though they are cheap. I do not mind sending them to any number of addresses as I think it will not be equal to one man's life saving by your wonderful medicines.

I trust you will not object to this and that you will give instructions to Muller and other Companies. When I come at the time of the Hanover and trankfurt Fair I should like to meet you if you are in Germany. Kindly give me your address.

With best regards from myself and my mother.

Dear Mr. Naidu,

I have enjoyed your visit very much and appreciate your work in education and research in agriculture and in medicine. Of course we want to give you some presents you refused. But now I am sending a microscope as present in appreciation of your work for public and to have our long friendship. Kindly accept this I am sending through Mr. Kurt.

Very sincerely yours,
(Sd.) Rhein - Optik G.M.B.H.
Gerd Rasche

From Mr. Kaust (the friend who asked you to give medicine to Mr. Neef and who was sitting next to your table).

28th August, 1955.

Dear Mr. Naidu,

I thank you very much for your acceptance to give the medicine for the patients. I came to know that all the people who took the medicine for their Diabetes disease have been completely cured, and all of them are very healthy. Most of them with their friends came here to see you but you were not available. Several of them have sent some presents though I told them that you will not accept.

I am keeping them in the Shed, of course for your approval. When you come from the Exhibition I hope you will take them to satisfy the patients' friends. After taking them you can give it to somebody else here or in your country if you do not require them. May I know when you will be visiting here?

VILLA SAINT JEAN, Lausanne,
137, Avenue De Cour, 11—10—'55.

Dear Mr. Naidu,

Before you leave our country I wish to express more than in words our deepest gratitude for the progressive work you have achieved in agricultural medicine, for all the strenuous efforts you overcome to help, selflessly, suffering mankind.

I placed at your disposal five thousand swiss francs with M/S Solvil watchmakers at Geneva. Take what you like, the watches are good! I am only too pleased to present you with this gift and hope that you soon will return to see us all.

Sincerely Yours,
(Sd.) FRED SUTTER.

* * *

The schedule for my Far Eastern trip is ready. I doubt very much to find the time to deviate one or two days for Coimbatore. Anyhow my sincere hope is to see all your marvellous achievements in agricultural medicine at your own place, but it will be in future years.

Sincerely Yours,
(Sd.) FRED SUTTER.

21st October, 1955.

Emil Schmid & Alfred Kling, Metall, Lohn- und, Werkzeug Harterei – Stuttgart.

20th September, 1955.

Dear Mr. Kurt,

Yourself and your brother came and introduced Mr. Naidu sometime back. He came and worked here for some days and he was able to understand the very complicated tempering work to his satisfaction – unfortunately he does not know the German language and I did not know the English language but even then he managed.

He asked me to come to India but in my old age I cannot go there, but I promised to train his students when he sends them here. Now he has learned this art, therefore he can show his work to the students in his place itself. He has already sent 4 or 5 students and in that two or three students did not stay longer and they were not worthwhile. The other fellows are alright. He told me that he would be sending some more students and I shall be only too glad to give any information and training to them.

Mr. Naidu refused to take anything for work from our people and in the same way I also will not take anything from

Mr. Naidu. I was told that Mr. Nattar requested to give this scheme in the beginning and now he has given the scheme and agreed. Mr. Naidu has also given Diabetes medicine for his friend and perhaps that medicine made all the good.

He gave me sometimes some fruits which I liked very much and he promised to send some other fruits for which I am waiting. I do not know his present address therefore I am sending this letter to you and in turn please send it to him and ask him to send some fruits and photographs.

A. W. R. Brown, Axiom Patient Braun,
Hartmetallwerkzeugfabrik, Stuttgart-S.

25th June, 1955.

Dear Mr. Schmidtmann,

Mr. Naidu came here and worked with our machines, welding and making various tools. I was wondered to see him learning these complicated works in a shorter time than anybody else. He left some of his tools here which I am sending to you and in addition some more tools which I have ordered.

I hope Mr. Naidu will use these tools and the knowledge for the Indian mass.

Will you kindly ask him to write a letter to me here, so that I can keep it as a souvenir.

P. S. Please send these tools and this letter to Mr. Naidu.

C. W. KUHNS
AMANDUS KELLER,
Habmurg-Lokstedt.

President,
Industrial Labour Welfare Association Ltd.,
Gopal Bagh,
Coimbatore,
India. May 23rd, 1955.

Dear Sir,

I am sending you through my firm Amandus Keller, Hamburg-Lokstedt, to Madras

1 case, marked F. B.
141

MADRAS an unaccompanied luggage containing 1 Micro-Projector "EFBESKOP" with accessories, which I send you as a present for use at the Industrial Labour Welfare Association Ltd., and I hope that you will have good results in using same.

Nothing more to add for the moment and trusting to hear from you again soon, I am, with best wishes and kindest regards.

Yours sincerely,

Lausanne,
2nd August, 1955.

Mr. G. D. Naidu,
30, West Cromwell Road,
London – S. W. 5.

Dear Mr. Naidu,

Although you refused to take any presents from us I would like to pay for the several watches you mentioned in Solvil Co., to send as gifts for your many friends. I hope you will at least accept this and give the names to the Solvil Company.

In the meantime, I remain, dear Mr. Naidu,

Yours faithfully,
(Sd.) A. GUIGNARD.

Ulmer Strasse

May 14th, 1955
TE/Dg/Ks.

Dear Sir,

We refer back to our discussions at our stand in Hannover and have pleasure in advising you that the TECHNO-ENDOSCOPE in the required special combination has been sent out to the above stated address per airmail under date of May 13th.

We hope that the instrument will reach you safely. Enclosed please find our specification amounting DM 463. – which has been received in Hannover.

Separately we shall enter in connection with your India house because we are much interested to get sold our TECHNO-ENDOSCOPES in this country by mediation of capable importers.

With our best wishes for a pleasant journey to your home, we beg to remain, dear Sir,

Yours very faithfully,
Deutsche Endoskopbau Gesellschaft
